**Subject:** Re: GVP webinar

Hi Liz,

Peter and I have just discussed this, and we'd like to re-record our portion of the webinar so that the rationale is crystal clear for those who missed today's session.

We won't be able to capture today's question and answer session, but we want to be sure that the modeling makes sense for the working groups who will be using this output going forward.

This should be taking place in the next few days, and I'll be sure to share as soon as it has been recorded.

Thanks for understanding,

Brooke

**Subject:** Re: GVP webinar

Hi Liz,

Thanks!

We did record the webinar, but unfortunately because we used our own call-in line to accommodate international participants, the audio does not seem to have been captured in the recording.

I am planning to share the Powerpoint with notes to explain some of the points that we discussed that were not explicitly written on the slides. The modeling team will also be available in the next week to field any questions from GVP members who were unable to call in today.

I'll be sending those through later this afternoon.

Best,

Brooke

Hi Brooke,

The webinar looked great this morning. We did have some trouble logging in and some of Jonna's group were not able to connect. Would it be possible to get a copy of or link to the complete webinar so that we can send to our Working Group Leads for viewing?

Thanks, LIZ
